EDUCATION

Vilniaus Verslo Kolegija

Bachelor of Science in Computer Science

Vilnius, Lithuania

Sep. 2023 – May 2026

EXPERIENCE

Customer service representative

March 2024 – February 2025

Teleperformance

Vilnius, LT

- * Delivered effective solutions for technical issues on the Booking.com Extranet platform, handled special requests, and efficiently resolved host complaints.

PROJECTS

Mecano | *Figma, Flutter, Node.js + Express, PostgreSQL, Docker, Git, Render*

November 2024 – January 2025

- Developed a mobile application connecting car owners with mechanics for immediate roadside assistance as part of a college project, collaborating with a team of two.
- Implemented the backend using Node.js and Express, handling user authentication, ride requests, and core business logic
- Learned how to collaborate on software development using GitHub for version control and Agile methodologies for project management, enhancing team efficiency and workflow.

LockIn | *React Native + Expo, TypeScript, Node.js, PostgreSQL, Docker, Git*

February 2025 – present

- Developed LockIn, a modern, user-friendly to-do list mobile application designed to enhance productivity and streamline task management.

Grade Calculator | *C++/CLR, .NET Framework, Windows Forms, Microsoft Visual Studio*

January 2025

- Developed a simple Windows Forms application to streamline the management of student grades and academic score calculations, tailored for educational environments.
- Created an MSI setup file to enable quick and efficient installation of the application.
- The application includes a built-in text editor for writing, opening, and saving documents, enhancing its functionality.
