EDUCATION

Vilniaus Verslo Kolegija

Bachelor of Science in Computer Science

Vilnius, Lithuania

Sep. 2023 – June 2026

EXPERIENCE

Junior Java Full-stack Developer

HyPlus

August 2025 – current

Vilnius, LT

- * Contributed to the development of an enterprise-grade application serving thousands of users.
- * Built end-to-end features across the full stack, from database schema design to responsive frontend interfaces
- * Developed and maintained automated unit and integration tests to ensure code reliability.
- * Deployed and monitored production-ready applications using CI/CD pipelines.
- * Engineered scalable features for a high-traffic enterprise platform and optimized application performance by improving database queries, reducing average API response time from approximately 215ms to 90ms, and improving database query performance by approximately 40%
- * Collaborated with cross-functional teams to translate business requirements into technical solutions.

Technical Support

Teleperformance

March 2024 – February 2025

Vilnius, LT

- * Delivered effective solutions for technical issues on the Booking.com Extranet platform, handled special requests, and efficiently resolved host complaints.

PROJECTS

EventSync | *Java, Spring Boot, React, H2, Docker, Git, AWS EC2*

June 2025

- * Developed a Spring Boot backend for analyzing event feedback, exposing a RESTful API for data collection and management.
- * Integrated AI-driven decision-making to enhance system intelligence and functionality.
- * Containerized the application using Docker and deployed it to AWS ECS with a CI/CD pipeline for automated and scalable cloud-based deployment.
- * Built a responsive React-based frontend to consume and test backend services, ensuring a seamless user experience.
- * Implemented comprehensive unit and integration testing to ensure high code coverage and system reliability.

SMILE | *React, Vite, TypeScript, Tailwind CSS, Sanity CMS, Vercel, Git*

February 2026

SMILE Website

- * Built and deployed a live consultancy website used by prospective students, delivering a polished, mobile-friendly experience with reusable frontend components.
- * Integrated Sanity CMS for structured content management and built backend email handling for form submissions, improving data flow and lead capture.
- * Deployed the application on Vercel and managed the project with Git, demonstrating end-to-end delivery of a production-ready web application.

Food Delivery Service | *Java, Spring Boot, PostgreSQL*

April 2025

- * Developed a layered Java application, following clean architecture principles (OOP, SOLID) and organizing the project into a multi-module Maven structure to separate concerns and improve maintainability.
- * Used JPA for reliable data storage, supporting key workflows like food browsing, cart updates, and order processing.
- * Applied advanced Java concepts like dependency injection, logging via Spring AOP, and design patterns to ensure scalability and maintainability.

TECHNICAL SKILLS

Languages: Java, C++, SQL, JavaScript, HTML/CSS, TypeScript

Frameworks: React, .Net, Spring Core, Spring Boot, Express, Jakarta EE

Developer Tools: Maven, Node.js, Git, Docker, IntelliJ, Sequelize, Hibernate, Jenkins, IBM WebSphere Liberty
